# LUXURY CRAFTSMANSHIP *MEETS EFFORTLESS PERFORMANCE*

“Through fifty years of refinement and a collaboration with designer Valerio Rivellini, the Senese family have crafted the Mimì Libeccio 13.5 Cabin for discerning boaters.”

The 13.5 Cabin is a highly optioned luxury cruiser that combines timeless Amalfi Coast styling with modern innovation. Blending refined craftsmanship with purposeful performance, this latest luxury cruiser delivers a compelling package for those seeking both comfort and capability on the water. At its core is an advanced vacuum-infused hull, engineered for optimal strength, reduced weight, and enhanced efficiency, qualities that translate directly into a smoother, more responsive ride underway.

Aesthetically, the vessel makes an immediate impression. Full teak decks underfoot are complemented by beautifully hand-bent, aged teak detailing throughout, creating a timeless, high-end finish. Carbon fibre poles and extended sunshade options add a contemporary edge while increasing onboard versatility for long days in the sun.

Designed with ease of handling in mind, the inclusion of joystick control transforms docking into a stress-free exercise, while a proportional bow thruster ensures precise manoeuvrability without the frustrating cut-outs often experienced in critical moments.

Twin Yanmar 370hp Biturbo 8LV shaft drive engines provide dependable power, delivering a comfortable cruising range between 15 and 25 knots, and a top speed of around 30 knots.

Life on board is equally impressive. Three well-appointed cabins, including a generous owner’s suite and two twin cabins, offer accommodation for extended cruising, supported by two stylish bathrooms complete with electric freshwater flush systems and full walk-in showers. Reverse-cycle air conditioning throughout, paired with an 8kW generator, ensures comfort in all climates. The social spaces are thoughtfully configured for both relaxation and entertaining. Multiple convertible seating areas enable seamless transitions among dining, lounging, and sunbathing, while expansive fore and aft sun pads invite guests to unwind.

The indoor/outdoor galley is fully equipped with a sink, electric cooktop, and twin fridges, making onboard catering effortless. Entertainment is elevated with a pop-up 40-inch TV and a premium surround sound system featuring 12 speakers, a subwoofer, and dual amplifiers. Outside, an electric telescopic teak table anchors the alfresco entertaining zones. Practicality hasn’t been overlooked. A tender garage accommodates a 1.8m tender or water toys, while the large swim platform, complete with hot and cold shower and swim ladder, enhances time spent at anchor. With CE Category B offshore capability for up to 14 passengers, this is a vessel equally at home on coastal adventures or extended escapes.

## SPECIFICATIONS

**Length Overall** 13.5m (44ft)
**Beam** 4.25m
**Draft** 1m
**Displacement** 10,180kg
**Engines** Twin 370hp
