HERITAGE. CRAFTSMANSHIP. PERFORMANCE.

For the first time, Cantiere Mimì will appear at the upcoming Sanctuary Cove International Boat Show, alongside its dealer Boatology. The shipyard will showcase two models from its Libeccio range: 11 and 13.5 Cabin.

While Boatology may prefer the spotlight on the flagship 13.5, it was the beautifully proportioned and highly capable 11 that stood out to us, particularly at a more accessible price point. That said, a full review of the Libeccio 13.5 is coming in a future issue of *Powerboat Magazine*.

The Libeccio 11 Cabin blends classic Italian design with modern performance and liveability. Developed with renowned naval architect Valerio Rivellini, it delivers a refined offshore experience well suited to Australasian conditions. Its vacuum-infused fibreglass hull ensures strength, efficiency and smooth handling, while the hand-laid teak decking and mahogany trim bring timeless elegance. A sleek fibreglass T-top provides protection over the helm and cockpit, complemented by practical features such as an aft swim platform with ladder and shower, electric trim flaps, and a fully equipped galley. Key systems including an electric windlass, automatic bilge pumps and a fixed fire extinguisher support safe, stress-free cruising.

Inside, the layout comfortably accommodates up to four guests, with an enclosed cabin and a convertible saloon. A fully enclosed bathroom with shower enhances onboard comfort, while the smart flow between helm, cockpit and living areas makes the boat ideal for entertaining or extended stays. Multiple lounging zones include a versatile alfresco dining area that converts into a daybed, adding to the boat's flexibility.

Powered by twin Yanmar 250hp engines with electronic controls, the Libeccio 11 reaches speeds of up to 30 knots, delivering smooth, quiet and efficient performance. With a 600-litre fuel tank, 200 litres of fresh water, and CE Category B certification for up to 12 passengers, it is well equipped for offshore use.

Owners can tailor their vessel with options such as bow and stern thrusters, a hydraulic gangway, air conditioning, a generator, upgraded navigation and entertainment systems, and underwater lighting. Additional touches, from courtesy lighting to protective covers, further enhance comfort and usability.

Combining heritage, craftsmanship and performance, the Libeccio 11 Cabin delivers a sophisticated and highly capable on-water experience.

SPECIFICATIONS

Builder Cantieri Mimi Srl, Naples, Italy
Length 11.00m
Beam 3.5 Metres
Draft 1.20 Metres
